DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-15, drawn to a stator frame with cooling conduit, classified in class 310, subclass 54.
 - II. Claims 16-24, drawn to a method of making a stator, classified in class 29, subclass 596.
2. The inventions are distinct, each from the other because of the following reasons: Inventions Group I and Group II are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case the product can be made by another materially different process, such as a spacer with connected to the spacer at a location other than the fingers; and the process can be used to make another materially different product, such as a cooling a stator frame which is not a cylinder, such as a polygon.
3. Because these inventions are distinct for the reasons given above and the search for the fingers connected to the conduit of Group II is not required for Group I, and the cylindrical frame of Group I is not required for Group II; and because the inventions have acquired a separate status in the art as shown by their different classification, the restriction for examination purposes as indicated is proper.

4. During a telephone conversation with Patrick Rasche on January 3, 2002 a provisional election was made with traverse to prosecute the invention of Group I, claims 1-15. Affirmation of this election must be made by applicant in replying to this Office action. Claims 16-24 are withdrawn from further consideration by the examiner, 37 CFR 1.142(b), as being drawn to a non-elected invention.

5. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Claim Rejections - 35 USC § 102

6. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

7. Claims 1-15 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Crowell et al.(Crowell)(US 5,859,482).
